

S-26 BUCCANEER LIQUID PLASTICS

2.9 S-26 SAVE IT

SOLVENT SOLUBLE

General application instructions

S-26 SAVE IT is unique protective solvent, designed to be applied OVER high quality water based paint or waterproof coating. It provides a protective cover to the freshly painted surface. It will allow the painted surface to cure without being damaged due to rain or dew.

S-26 SAVE IT is an invisible curing agent that reacts with uncured water based coating or paint prior to curing.

Application Instruction:

Important: See our Preliminary and General Notes

1. Apply S-26 SAVE IT over freshly painted surfaces at least 15 minutes before possible rain or moisture contain.
2. Open spray nozzle slightly to obtain a fine mist spray. Apply evenly over the entire coating to be saved. Do not leave areas exposed as these areas will not be protected.
